Subject: ACC Petition for Reconsideration on MON RTR
Attachments: ACC MON Reconsideration Petition Final 10-13-20.pdf

All,

As submitted today, please see attached for your reference a copy of the American Chemistry Council's petition for a reconsideration proceeding under Clean Air Act Section 307(d)(7)(B) for the Environmental Protection Agency's final National Emission Standards for Hazardous Air Pollutants: Miscellaneous Organic Chemical Manufacturing (MON) Residual Risk and Technology Review (85 Fed. Reg. 49084, Aug. 12, 2020). The petition details discrete provisions in the final MON RTR risk analysis that ACC believes warrant a reconsideration. A copy of this petition was also sent to the Administrator's account earlier today. If you or anyone from your office would like to discuss any of the issues in more detail, please feel free to contact us any time. Thanks very much.

Regards,
Brendan
